Leavitt Risk Partners announces the retirement of founder and CEO

It is with mixed emotions that we announce the retirement of Regi Schindler, the founder and CEO of Leavitt Risk Partners. For the two decades, Mr. Schindler has been a rare innovator in the insurance market, creating products under the BLISCare umbrella that have helped countless patients and their families. His retirement is effective as of December 31, 2022. We would like to publicly thank Regi for all that he has done as a driver of value-based arrangements in healthcare. And we wish him and his wife Debbie the best in this new stage of life!
